

Pain Parity for Pennsylvania

Preventing Opioid Use Disorder Before It Begins

Pain is one of the most common reasons people visit their doctor.

Each year, nearly 80 million Americansⁱ seek treatment to manage acute pain symptoms and opioids are often prescribed as a solution. While they can be effective, they can also pose significant health risks and increase chances of opioid dependency.ⁱⁱ

But breakthroughs in pain medication are enabling patients to have a choice in their pain management. Amidst the ongoing opioid epidemic, it is critical that patients have access to the treatments they want and need to address their pain.

Need for increased access to all pain treatment options

- Within one year of receiving an opioid medication to manage acute pain, approximately 85,000 Americans were diagnosed with an opioid use disorder.ⁱⁱⁱ
- Prescribing rates have fallen, but opioid use disorders and overdoses remain high. In 2023, Pennsylvania reported:
 - Nearly 3,000 opioid-overdose related emergency room visits^{iv}
 - More than 3,576 opioid overdose deaths^v
 - 36.4 opioid prescriptions dispensed per 100 people^{vi}
 - 0.7 naloxone doses dispensed per 100 people^{vii}
- Furthermore, in Pennsylvania, opioid use disorder cost Medicaid over \$1.84 billion in excess costs in 2022.^{viii}

Pain parity legislation for equal access to pain treatment options

Across the country, states are introducing legislation to expand access to non-opioid treatments and therapies. These policy efforts, often referred to as “pain parity” legislation, address the health insurance barriers many patients face when trying to access non-opioid treatment options. Pain parity legislation ensures patients are not disadvantaged when accessing non-opioid options by:

- Prohibiting the use of utilization controls such as prior authorization and step therapy
- Equalizing cost-sharing for the non-opioid prescription drug and the opioid prescription drug

Pain parity legislation in Pennsylvania

In Pennsylvania there is important legislation focused on pain parity to help patients and families.

H.B. 2060 | S.B. 1196

State Representative Danilo Burgos (D-197) and Senator Christine Tartaglione introduced H.B. 2060 and S.B. 1196, legislation that requires Medicaid and commercial insurers to provide pain parity by ensuring FDA-approved non-opioid drugs are not disadvantaged in coverage, cost sharing, or utilization controls compared with opioids, applying upon FDA approval.

Contact your representative to let them know Alabama needs pain parity and help prevent addiction before it begins.
